## 1 Formal specification in Z

The formal specification of the system introduces the following three types:

```
SENSOR\_TYPE, LOCATION\_TYPE, TEMPERATURE\_TYPE
```

The system's (partial) formal specification is given in the Z language and it consists of schemas and the definitions of operations that constitute the system's exposed interface.

### 1.1 Schemas and Operations given in the project

```
DeploySensorOK \\ \Delta TempMonitor \\ sensor?: SENSOR\_TYPE \\ location?: LOCATION\_TYPE \\ temperature?: TEMPERATURE\_TYPE \\ \\ sensor? \not\in deployed \\ location? \not\in ran map \\ deployed' = deployed \cup \{sensor?\} \\ map' = map \cup \{sensor? \mapsto location?\} \\ read' = read \cup \{sensor? \mapsto temperature?\} \\ \\
```

. Success \_\_\_  $\Xi TempMonitor$ response!: MESSAGEresponse! = 'ok'SensorAlreadyDeployed \_\_\_  $\Xi TempMonitor$  $sensor?: SENSOR\_TYPE$ response!: MESSAGE $sensor? \in deployed$ response! = 'Sensor deployed' LocationAlreadyCovered \_\_\_\_\_  $\Xi TempMonitor$  $location?: LOCATION\_TYPE$ response!: MESSAGE $location? \in ran map$ response! = 'Location already covered' Location Unknown \_\_\_\_  $\Xi TempMonitor$  $location?: LOCATION\_TYPE$ response!: MESSAGE $location? \not\in ran map$ response! = 'Location not covered' DeploySensor = $(DeploySensorOK \land Success) \oplus$  $(SensorAlreadyDeployed \lor LocationAlreadyCovered)$ 

 $(ReadTemperatureOK \land Success) \oplus LocationUnknown$ 

ReadTemperature =

#### 1.2 Added Schemas and Operations to Formal Specifications

```
. Move To New Location OK \_\_\_
\Delta TempMonitor
sensor?: SENSOR\_TYPE
location?: LOCATION\_TYPE
sensor? \in deployed
location? \not\in ran map
map' = map \oplus \{sensor? \mapsto location?\}
SensorNotDeployed _____
\Xi TempMonitor
sensor?: SENSOR\_TYPE
response!: MESSAGE
sensor? \notin deployed
response! = 'Sensor not deployed'
LocationAlreadyOccupied _____
\Xi TempMonitor
location?: LOCATION\_TYPE
response!: MESSAGE
location? \in ran map
response! = 'Location already occupied'
GetLocationOK\_
\Xi TempMonitor
sensor?: SENSOR\_TYPE
locations!: LOCATION\_TYPE
sensor? \in deployed
locations! = map(sensor?)
```

 $\begin{array}{l} \textit{MoveToNewLocation} \; \hat{=} \\ (\textit{MoveToNewLocationOK} \land \textit{Success}) \; \oplus (\textit{SensorNotDeployed} \lor \textit{LocationAlreadyOccupied}) \end{array}$
